

Ask an Expert

From the Center for Innovation in Engineering and Science Education, Ask an Expert has links to experts in the fields of general science, astronomy, biology, physics, oceanography, geology, weather, and health, and more! Have students contact an expert and see if their questions are answered. Some questions are “pre-answered” on the links on the web sites, others are emailed to scientists, and some are answered in podcasts. It’s a great way to get students thinking about good questions to pose to scientists.

Ask An Expert Sites

Welcome to the Teachers and Librarians from Australia and New Zealand!

We’re glad you are using Infotopia and our other search engines! Just let us know what new topics your students are studying and we’ll create new resource pages for you!

In the meantime, check out our page on Australian history. Please send us your feedback. (You are the experts.)

<http://infotopia.info/aussihist.html>

Greek Mythology

As promised, our new resource page on Greek Mythology is ready. We would love to receive input from you regarding these web sites. As always, encourage your students to also search for their topics such as Zeus, Poseidon, etc. in the Google Custom Search Box on Infotopia.info.

DECEMBER EVENTS

Check out these great web sites for December Events

<http://www.surfnetkids.com/calendar/>

<http://www.infoplease.com/spot/holidays.html>

Web Site of the Month from

From the University of Cambridge, students will learn all about forces and motion by being a “hired” participant to figure out if all the rides at an amusement park are built properly and safely. In this interactive experience, students will learn all about gravity, force, friction, motion, compression, and the unit of force--the Newton. Students will read “e-mails,” answer quiz questions, and ride four different rides during this science learning adventure.

Send us suggestions or research topics that you need to be added to Infotopia or Kidtopia.

Do your students want to browse through the decades of American history? What were the fashions from the 1940's? What were the popular foods of the 1950's? Discover toys, games, cars, movies, food, and more pop culture from the past 100 years. Students can listen to music, watch video clips, observe advertisements from the past, experience past presidential elections and debates, and much, much more. What a great way to get students interested in history!
